TANYA VINAIK

Full-Stack Software Developer | React.js, Node.js, AI/RAG Engineering

Email: vinaiktanya12@gmail.com | **Mobile:** +91-9518646835 | **LinkedIn:** linkedin.com/in/tanyavinaik | **GitHub:** github.com/tanyavinaik

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 1.5+ years of experience building and deploying high-performance web applications using React.js, Node.js, Express.js, and RESTful APIs. Focused on AI/RAG solutions, LLM integration, and AI agent development, with a track record of improving system performance and automating enterprise workflows. Strong communicator who collaborates closely with cross-functional teams to translate requirements into reliable solutions.

Core Competencies: Full-Stack Web Development • RESTful API Design • Microservices-style Architecture • AI/RAG Engineering • LLM Integration • AI Agent Development • Database Optimization • Workflow Automation • Agile/Scrum • Cross-functional Collaboration • Problem Solving • Git/GitHub

TECHNICAL SKILLS

- **Frontend:** React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Lightning Web Components (LWC)
- **Backend:** Node.js, Express.js, REST API Development, Webhooks, Microsoft Graph API, Unit Testing (Mocha, Chai)
- **Databases:** MongoDB, MySQL, PostgreSQL, Vector Databases (Supabase)
- **AI / Automation:** LLMs (OpenAI, Groq), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, Embeddings, OCR, Azure Logic Apps
- **Tools & Platforms:** Git, GitHub, Postman, Jira, Salesforce, CI/CD, Agile/Scrum, Software Development Life Cycle (SDLC)

WORK EXPERIENCE

Software Developer | LeewayHertz, Gurugram, India **August 2025 – Present**

- Developed and deployed high-performance full-stack web applications using React.js, Node.js, and Express.js, serving 10,000+ users with 99.9% uptime.
- Integrated LLM-based solutions (ZBrain) into production workflows, increasing user engagement by 35%.
- Optimized SQL and MongoDB queries and indexing strategies, improving API response time by 40%.

Invoice-to-Pay Automation Platform | React.js, Node.js, Express.js, Microsoft Graph API, Azure Logic Apps, REST APIs

- Engineered an end-to-end invoice automation pipeline using 6 independent, microservices-style Azure Logic Apps workflows, eliminating manual processing overhead.
- Built a full-stack application (React.js, Node.js, Microsoft Graph API) enabling seamless enterprise workflow integration and smooth ERP data flow via REST APIs.

Accident Claim Workflow Platform | React.js, Node.js, REST APIs

- Built a React.js frontend for accident claim workflow visualization, working closely with backend engineers to integrate REST APIs for real-time data exchange and end-to-end progression.

Software Developer Intern | LeewayHertz, Remote **February 2025 – July 2025**

- Contributed to full-stack feature development using React.js and Node.js within an Agile/Scrum environment, collaborating closely with designers, backend engineers, and QA.
- Built RAG-based AI agents using ZBrain to automate business workflows, reducing manual case handling effort for the operations team.

AI Agents Integrated with Salesforce (Case Intelligence) | Salesforce, AI Agents, LLMs

- Architected AI agents within Salesforce to automate case analysis, including a Case Summary Generation Agent that condenses complex case data, cutting manual review time for case handlers.

PROJECTS

AI Codebase Explainer (Codeless Repository Analysis Platform) | React.js, Node.js, Express.js, LLM (Groq/OpenAI), RAG, Supabase, Vector DB

- Built a platform using Retrieval-Augmented Generation (RAG) to analyze and explain full code repositories through conversational chat.
- Automated code ingestion: cloned and parsed repositories, chunked files, generated vector embeddings, and stored them for efficient semantic search.
- Built an interactive React Flow graph visualizing file relationships and code structure across frontend and backend layers.
- Designed backend APIs for repository processing, query handling, and context retrieval, optimizing token usage and latency.

EDUCATION

Master of Computer Applications, Chandigarh Group of Colleges | CGPA: 9.18 **August 2023 – August 2025**

Bachelor of Science, Computer Science, Panjab University | Percentage: 86.6% **August 2019 – July 2022**

CERTIFICATIONS

Professional Course in Java — Rajeev Gandhi Computer Saksharta Mission (RGCSM)

Training in Frontend Development — Excellence Technology

ACHIEVEMENTS

- Awarded Rising Star (2026) at LeewayHertz for outstanding performance and innovation.
- Awarded and recognized as Employee of the Quarter, Q2 2026.
- Qualified IIT JAM 2023 (Mathematics) — cleared national-level competitive examination demonstrating strong quantitative aptitude.
